

 **Sample Dataset: Sales Data**

| OrderID | Date       | Region | Salesperson | Product    | Category    | Units | Unit Price | Payment Mode |
|---------|------------|--------|-------------|------------|-------------|-------|------------|--------------|
| 1001    | 01-01-2026 | North  | Rahul       | Laptop     | Electronics | 2     | 55000      | Card         |
| 1002    | 02-01-2026 | South  | Anjali      | Printer    | Electronics | 1     | 12000      | Cash         |
| 1003    | 03-01-2026 | East   | Vikram      | Desk Chair | Furniture   | 4     | 4500       | UPI          |
| 1004    | 04-01-2026 | West   | Sneha       | Monitor    | Electronics | 3     | 15000      | Card         |
| 1005    | 05-01-2026 | North  | Rahul       | Table      | Furniture   | 2     | 8000       | Cash         |
| 1006    | 06-01-2026 | South  | Anjali      | Laptop     | Electronics | 1     | 60000      | UPI          |
| 1007    | 07-01-2026 | East   | Vikram      | Mouse      | Accessories | 5     | 800        | Card         |
| 1008    | 08-01-2026 | West   | Sneha       | Keyboard   | Accessories | 6     | 1200       | Cash         |
| 1009    | 09-01-2026 | North  | Rahul       | Printer    | Electronics | 2     | 11000      | UPI          |
| 1010    | 10-01-2026 | South  | Anjali      | Desk Chair | Furniture   | 3     | 5000       | Card         |

 **LEVEL 1: Basic Tasks (Formulas + Formatting)**

 Add a Total Sales Column

Create a new column:

Total Sales = Units \* Unit Price

## 2 Calculate:

- Total Revenue
- Average Revenue per Order
- Maximum Sale Value
- Minimum Sale Value

Use:

- SUM( )
- AVERAGE( )
- MAX( )
- MIN( )

## 3 Count:

- Total number of orders → COUNT( )
- Orders from North region → COUNTIF( )
- Electronics category orders → COUNTIF( )

## 4 Conditional Formatting

Highlight:

- Sales greater than ₹50,000
- Units greater than 4

## 🟡 LEVEL 2: Logical + Text Functions

### 5 Add Performance Column

If Total Sales > 50,000 → "High"  
Else → "Normal"

Use:

IF( )

## 6 Extract Month from Date

Create a column:

```
=MONTH(Date)
```

## 7 Combine Fields

Create a column:

```
Region – Salesperson
```

Use:

```
CONCAT() or &
```

## 8 Round Off Total Sales

Use:

```
ROUND()
```

# ● LEVEL 3: Sorting, Filtering, and Data Analysis

## 9 Sort:

- Highest to lowest Total Sales
- Region A → Z

## 10 Filter:

- Only Electronics category
- Only Corporate customers
- Sales above ₹30,000

# ● LEVEL 4: Lookup & Reference

Create a new table:

### Commission Table

| Salesperson | Commission % |
|-------------|--------------|
| Rahul       | 5%           |
| Anjali      | 6%           |
| Vikram      | 4%           |
| Sneha       | 5%           |

Use:

```
VLOOKUP() or XLOOKUP()
```

To fetch commission %.

Calculate Commission Amount

```
Commission = Total Sales * Commission %
```

## 🟡 LEVEL 5: Pivot Tables

Create Pivot Tables to answer:

1. Total Sales by Region
2. Total Sales by Category
3. Total Sales by Salesperson
4. Count of Orders by Payment Mode
5. Region vs Category matrix

## 🔴 LEVEL 6: Charts

Create:

- Column chart → Sales by Region
- Pie chart → Sales by Category

- Line chart → Sales over Date
- Bar chart → Salesperson Performance

## **LEVEL 7: Data Cleaning Practice**

Practice:

- Remove duplicates
- Convert text dates to proper date format
- Check for blanks
- Trim extra spaces ( `TRIM()` )
- Convert text to proper case ( `PROPER()` )
